

BloodSTOP®

CONTROLS BLEEDING INSTANTLY

BloodSTOP® is a revolutionary water-soluble hemostatic gauze which literally stops bleeding in a matter of seconds – whether from a minor wound or major surgery. Upon contact with blood, BloodSTOP® speeds coagulation and expands into a gel that adheres to the surface while applying pressure on, and sealing, the wound. The protective see-through seal aids in wound monitoring, eliminating the need to remove and attach bandages. BloodSTOP® is 100% natural cellulose, promoting faster healing than other products. BloodSTOP® is for all cuts, wounds and venipuncture.

A Must for First Aid Kits

- Biodegradable
- Hypoallergenic
- No stinging, no burning
- Water soluble
- Reduces pain on application and removal
- For children and adults
- Individual sterile packets of gauze are safe and easy to carry everywhere.

WHEN EVERY SECOND COUNTS

Good For

- Nosebleeds
- Razor Nicks
- Bleeding Disorders
- Blood Thinner Medication Patients on Coumadin, Plavix, or Aspirin

Minimizes

- Blood loss
- Infections
- Scars

New Innovation!

More effective healing and faster bleeding control than traditional methods
